Submit

1. Create a web page to take surveys with three questions. Each question should have five possible answers.
2. Make sure the user can clearly see when an answer is selected (visually highlight the chosen answer). **Design the UI to match the provided image as closely as possible.**
3. Add a "SUBMIT" button at the bottom of the page.
4. When the user clicks "SUBMIT," store their answers in a single row in a database table. The answers should be saved in a column named ANSWERS in JSON format. Each answer will be represented as "1" for "Very Inaccurate" and 5 for "Very Accurate."
5. For example, if the user selects "Very Inaccurate" for Question 1, "Neither Accurate nor Inaccurate" for Question 2, and "Very Accurate" for Question 3, the saved JSON would look like this:

```
{"Q1": "1", "Q2": "3", "Q3": "5"}
```
